Reliability Engineering and System Safety **31** (1991) 405–407

CONTENTS OF VOLUME 31

Number 1

Semi-Markov Reliability Analysis of Three Test/Repair Policies for Standby Safety Systems in a Nuclear Power Plant 1
WOO S. JUNG & NAM Z. CHO (Republic of South Korea)

An Economic Preventive Maintenance Scheduling Model with Truncated Gamma Function 31
CELESTINE A. NTUEN (USA)

A New Approximate Method to Calculate the Time-Specific Unreliability of a Repairable System 39
QIN ZHANG (People's Republic of China)

An Optimal Design of Accelerated Life Test for Exponential Distribution . . 57
D. S. BAI & S. W. CHUNG (Republic of South Korea)

Insights from the Benchmark Exercises and Impact on Methodological Development 65
A. POUCET (Italy)

Radiation Protection and the Interface with Safety 91
H. J. DUNSTER (UK)

The Impact of Load Changing on Lifetime Distributions 99
H. BÄHRING & J. DUNKEL (FRG)

Technical Notes

A Dynamic Reliability Model for Nuclear Fuel Element 111
KIE-YONG CHOI, SOON-HEUNG CHANG & YOUNG-KU YOON (Republic of South Korea)

Earthquakes: Risk, Damage and Recovery 117
SHERIF Y. S. (USA)

Calendar 127

Number 2

Monte Carlo Simulation of Crew Responses to Accident Sequences . . . 129
PAOLO VESTRUCCI, ROMANO SANTUCCI & ROBERTO CALDERAN (Italy)

Reliability Engineering and System Safety (**31**) (1991)—© 1991 Elsevier Science Publishers Ltd, England. Printed in Great Britain

Use of Bayes' Theorem and the Beta Distribution for Reliability Estimation Purposes 145
MARTIN SHAW (UK)

On Risk and Risk Analysis 155
YOSEF S. SHERIF (USA)

A Quitting Rule for Monte Carlo Simulation of Extreme Risks 179
GORDON WOO (UK)

A New Shock Damage Model: Part I—Model Formulation and Analysis . . 191
D. N. P. MURTHY & B. P. ISKANDAR (Australia)

Letters to the Editors 209

A New Shock Damage Model: Part II—Optimal Maintenance Policies . . 211
D. N. P. MURTHY & B. P. ISKANDAR (Australia)

Letters to the Editors 233

The Hypercone Method for Structural Reliability Analysis: Its Theoretical Principles 239
AHMED MEBARKI, MICHEL LORRAIN & JEAN BERTIN (France)

On Reliability Calculations when Stresses are Generated by a Non-homogeneous Poisson Process 255
G. R. DARGAHI-NOUBARY (USA)

Calendar 265

Number 3

On a Type of Dependency between Weibull Lifetimes of System Components . 267
JERRY FILUS (USA)

Use of Digital Simulation in Reliability Analysis for the Design of Industrial Process Control Systems 281
M. SIKORSKI (Hungary)

Safety Objectives in Nuclear Power Technology 297
S. A. HARBISON (UK)

A Practical Comparison of Several Algorithms for Reliability Calculations . 309
URSULA NIESSEN-GILLHAUS &
WINFRID SCHNEEWEISS (Germany)

The Renewal Function for an Alternating Renewal Process, Which Has A Weibull Failure Distribution and a Constant Repair Time 321
J. M. DICKEY (USA)

Risk Tolerance and Safety Management 345
R. V. KEMP (UK)

Periodic Replacement Model for a Parallel System Subject to Independent and Common Cause Shock Failures 355
MIN-TSAI LAI & JOHN YUAN (Taiwan)

Additive Hazards Models in Repairable Systems Reliability 369
M. PIJNENBURG (The Netherlands)

Technical Note
Microprocessor Based Redundancy Designer 391
K. K. AGGARWAL & SURESH SHARMA (India)

Book Reviews 399
